SUMMARY

Senior Data & Observability Consultant with 6+ years architecting enterprise monitoring platforms, data pipelines, and analytics solutions for complex IT environments. Proven track record designing scalable data ingestion architectures, distributed systems observability, and IT service intelligence frameworks for enterprise clients at TekStream Solutions — with deep platform expertise built primarily on Splunk Cloud, Enterprise, and ITSI. Passionate about leveraging emerging technologies including AI to drive smarter data architecture and operational resilience.

Data Architecture · Observability · Enterprise Implementations · Data Pipeline Design · Client Advisory · AIOps · Data Analytics

PROFESSIONAL EXPERIENCE

Senior Splunk Consultant

TekStream Solutions

08/2025 - Ongoing · Atlanta, GA

- Architect end-to-end observability solutions for enterprise IT environments, defining monitoring strategy, data models, and service-health frameworks (implemented via Splunk ITSI).
- Designed full-stack observability coverage across spans, traces, logs, and metrics for distributed systems spanning Kubernetes clusters, Linux, and Windows infrastructure.
- Authored technical blog posts on observability architecture and monitoring best practices, contributing to thought leadership in the data and IT operations community.
- Mentor junior consultants and serve as a subject matter expert on data platform architecture, ingestion pipelines, and service intelligence configuration.
- Partner with clients to develop strategic observability roadmaps aligned with their IT operations and business goals.

Splunk Consultant

TekStream Solutions

05/2022 - 08/2025 · Atlanta, GA

- Delivered end-to-end data platform and IT service intelligence implementations for enterprise clients across multiple industries.
- Built data pipelines, dashboards, and alerting systems to transform raw operational data into actionable business and infrastructure insights.
- Designed data ingestion architecture for heterogeneous infrastructure and application sources, ensuring scalable, reliable data pipelines.
- Collaborated with client stakeholders to define monitoring use cases and translate business requirements into data and observability solutions.

Project Specialist

NRC Health

05/2019 - 05/2022 · Atlanta, GA

- Managed a portfolio of 30–40 enterprise clients simultaneously, overseeing \$4 million in contract value across project implementation and ongoing support.
- Partnered directly with clients to review Star Ratings calculations, identify discrepancies, and resolve issues with ratings display.
- Delivered data analytics, software support, and vital training to client staff to drive platform adoption and performance.
- Programmed and monitored Smart Request, a multiplatform survey feature that surfaced Google and Facebook listings for surveyed physicians to encourage public reviews and improve online reputation.

EDUCATION

Bachelor of Science, Information Technology

Georgia Southern University

08/2015 - 05/2019 · Statesboro, GA

TECHNICAL SKILLS

Data Architecture & Pipelines: Data Ingestion Pipelines · OTEL · Data Modeling · SQL · Splunk Data Ingestion

Analytics & Observability: Splunk Enterprise · Splunk Cloud · Splunk Observability Cloud · ITSI · SPL · AIOps · Data Analytics

Cloud, Infrastructure & Emerging Tech: AWS · Machine Learning · Grok · Claude · Visual Studio Code

CERTIFICATIONS

- Splunk Core Certified Consultant
- Splunk Accredited ITSI Implementation
- AWS Certified Cloud Practitioner
- Splunk Accredited Splunk Cloud Migrations Consultant
- Splunk Enterprise Cluster Administration
- Splunk Accredited Splunk Cloud Fundamentals Consultant
- Architecting Splunk Enterprise Deployments
- Troubleshooting Splunk Enterprise
- Splunk Accredited Sales Rep I
- Grafana Observability Sales Professional

PROFESSIONAL DEVELOPMENT

AI Exploration & Development

Actively exploring and testing large language models including Grok, Claude, and Meta's Llama, with hands-on experience running a self-hosted home AI server using Llama. Focused on understanding AI and its practical benefits to improve productivity and enhance performance in the workforce.

Continued Specialization in Observability & AIOps

Actively pursuing the Splunk Accredited Observability Consultant I certification, with coursework completed toward infrastructure monitoring, log observability, and cloud-based observability platform implementation. Building on existing data platform expertise to deepen specialization in full-stack observability architecture.

Industry Engagement & Thought Leadership

Actively engaged in the Splunk community through technical blog contributions published via TekStream Solutions, covering topics including ITSI new features and observability tooling. Committed to staying current with emerging trends in AIOps, observability, and enterprise IT through community involvement and continuous self-directed learning.
